Image Templates

Okay, when I start a group, I always get my designer to create a bunch of image templates that I can just pop into Canva, change the wording, and make it workable in my group.

So here's my list of image templates. And you can download a checklist, and we're also creating image templates for you to pop into Canva and use, as well.

Creating Your Image Templates

So here are the ones that I want you to use.

I want you to have:

- 1) at least one cover image,
- 2) one or two event images,
- 3) one to three file covers,
- 4) and three or more post images.

And here's how I want you to use them.

- 1) Your cover image, well, it's going to be used for your cover image.
- 2) Your event images, you'll use these for creating events in your group. Your file images, you'll use these for the top header of your file when you create files in your Facebook group.
- 3) And then post images, you're going to use these to communicate with members. It's going to be your intro post, it's going to be announcement post. It's going to let them know when modules are available, or new deliverables are up. Those you're going to use to communicate with your group.

All right, go ahead and download the checklist and the images.
