Social icon on your website

I looked all over Facebook and on Facebook sites for a specific icon that signifies a group, so for a group social media icon for Facebook, and I couldn't find it anywhere. We did find ones within Facebook but they weren't downloadable, and when I reached out to Facebook they didn't have anything.

So we created one for you. And as part of this group and part of this course you get to download it. It's in the download section.

Download it, put it on your website beside all your other social media like Instagram, Facebook, YouTube, etc., and have that link directly to your Facebook group link. So that would be facebook.com/groups, whatever your group name is.

If you don't know what that is, you can go to "Edit group settings," go down to the link section, and you can copy and paste it; or simply visit your group and copy and paste the link on the top right.

All right. Hope you liked that little bonus we got for you.
